ADC

Executive Brief

Recipe Management

Complete recipe and ingredient management for improved performance and output.

Recipe Management

With all your recipe data at your fingertips, it's never been easier to build, track, and maintain legally compliant recipes across your organization.

ADC's Recipe Management solution takes the hassle out of recipe and ingredient management by allowing fresh food retailers to manage recipes in one centralized location.

Remotely access and sync food ingredient information from a supplier or wholesaler while generating workflows for ingredient and recipe approvals. It's all there with Recipe Management.

Key Benefits

Automatically calculate the costs of all recipes

Enable compliance with current and future regulations regarding nutrition and labeling requirements
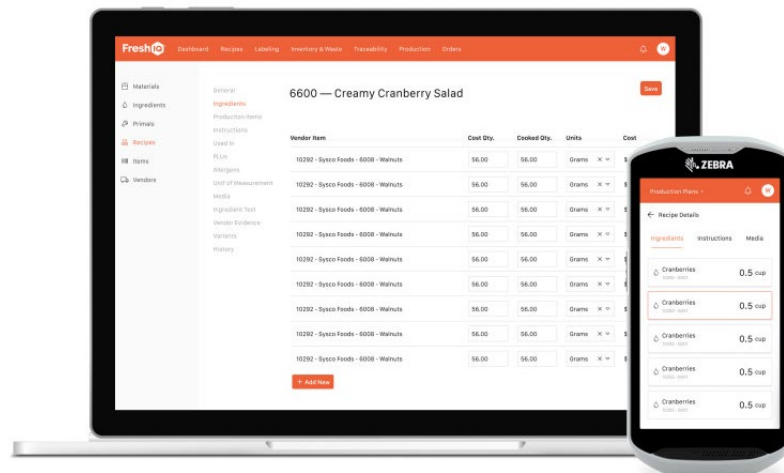

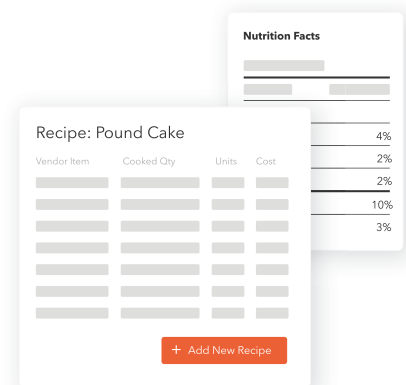

Replace paper-based recipe cookbooks with digital cookbooks that are updated in real time

Provide a single standardized solution for vendors to enter their information for you to use within your recipes

Key Features

- Build and maintain recipes
- Create digital cookbooks
- Store and maintain ingredient data
- Produce ingredient and allergen statements for store associates, visible on a mobile device
- Generate nutritional labels
- Calculate true recipe costs
- Integrates with multiple ERP systems
